

Master Reminder Dashboard — Quick Guide

All recurring compliance tasks: calibration · validation · PM · EM rounds · stability · QA / QC / Micro / Engineering

pharchem.github.io/enicar-master-reminder

1 Open the link on any phone or computer — no login needed

Tap your department's card (its border turns blue). Use the coloured chips to filter — **Overdue**, **Due this week**, Upcoming — or type an equipment ID / task name in the **search box**.

Enicar — Master Reminder Dashboard

Tick tasks done or reschedule with a reason — every change is audit-logged with an IST timestamp. Live Sheet · 19 Jul 2026

2 Finished a task? Tick it — three buttons on every open task

- ✓ **Action done** — tick when the physical work is completed (calibration performed, PM executed, plates read).
- ✓ **Report done** — tick when the record/report is filed; paste the report link if you have one. Reminders stop only after this tick.
- ↶ **Undo** — ticked by mistake? Undo resets it; both the tick and the undo stay in the audit log.

The first row below is already action-ticked (green ✓ with Undo) but its report is still pending — so it stays on the board until "Report done" is ticked.

PM - PW Water Skid & Recirculation System 01

196d overdue

✓ Action done

✓ Report done

↷ Reschedule

UTL/04003 · preventive maintenance · due 04 Jan 2026 · report by 14 Jan 2026

3 Can't do it on time? Reschedule — never let it sit overdue

Tap ↷ **Reschedule**, pick the new date and give the reason (mandatory).

The original date is preserved and the Director sees any task pushed

Reschedule task

PM - Boiler — currently due 12 Jul 2026

New due date

24/07/2026

Reason (required — recorded in the audit log)

Spare part arriving 23 Jul

Cancel

Save reschedule

4 What you must do THIS WEEK

- Open your department's **Overdue** list.
- Everything already completed in reality → tick **Action done** + **Report done**.
- Genuinely pending items → finish them, or **Reschedule with a reason**.

QA will verify every tick against the physical records. Each tick, undo and reschedule is written to a permanent audit log with your action's date and time (IST). Tick only what is genuinely complete.

Deadline: Sunday 26 July. From **Monday 27 July** the automatic reminder cycle starts — anything still open generates emails, and overdue items send **[CRITICAL]** escalations to management every 3 days until closed.
